

Winning Bridges from Previous Years

The Bridge Competition is possible because of the generous support from NASA sponsored [Georgia Space Grant Consortium](#) which promotes STEM education through various school and informal educational events around Georgia as well as research activities of university students supporting NASA programs through various fellowship and scholarship programs.

Year	Bridge Mass (g)	Breaking Load (g)	Structural Efficiency*
2003	28.1	10276	366
2004	25.6	5789	226
2005	22.8	10198	447
2006	17.5	9489	542
2007	23.7	13253	559
2008	28.1	11114	396
2009	22.7	5930	261
2010	25.8	11542	447
2011	22.6	9332	413
2012	27.5	11932	434
2013	22	5603.5	255
2014	28.3	10811.4	382
2015	25.6	18248.1	713
2016	24.2	13244.3	547
2017	26.7	13717.1	514

*Structural Efficiency is measured by dividing the breaking load by the bridge's mass
